

GAM250 Game Press Kit Guidelines

A press kit includes several pieces of data/information to help spread word about an upcoming release or major update to press outlets.

Here's an example for the Godzilla (1998) movie:

<https://www.worthpoint.com/worthopedia/godzilla-1998-press-kit-13-glossy-2069681857>

Journalists don't actually like their jobs, so you have to provide as much as you can for them to copy/paste. You also need to include concrete details that describe your project so that they do not misrepresent what you've created. As such, you need to use professional-level English... (Use correct grammar and spelling.) Do not submit a document that does not have flawless English. Additionally, you need to include plenty of images/visuals for them to use in order to grab attention!

Your press kit should be turned in as a .ZIP file that includes the following:

- Beautiful press kit document for people to read (.PDF or .HTML file)
- Text-only version of the press kit document (.TXT file, only)
- Images (.PNG's, .GIF's, etc)
- Trailer (If you create a trailer) (.MOV, .MP4, etc)
- It must contain exciting gameplay videos (.MOV, .MP4, etc)

Inside of your beautiful presskit document file (.PDF or .HTML file), you need to include the following information:

- **Large logo or title**
 - Include a large logo or branding at the top
 - Maybe even logo for your team
- **Quick Facts:**
 - Name of the game should be included (Obviously)
 - Perfect elevator pitch
 - Developer contact information (Name, E-mail, etc)
 - Features in a bulleted list (Example: Number of levels)
 - Links (Link to game's website, GitHub page, developer website, social pages if applicable)
 - Platforms and planned release dates (system requirements)
 - Price (We obviously are not selling a game, so you don't need to do this)
- **Demo:**
 - Link to get game or demo or how to get a key (You don't need to actually release your game or demo)
 - System requirements for the demo
- **Description:**
 - Longer description of the game
 - Gameplay description, explaining how to play
 - Awards, recognitions, important reviews, notable reception

- Screenshots, animated .GIF's,
- Branding imagery, including logos, icons, banner images, character renders, etc
- Music tracks (No need to include this because I suggest using a .PDF's)

- **Misc:**

- Call to action
- Developer(s) description and even team description

Example presskits:

- Octodad: https://younghorsesgames.com/press/sheet.php?p=octodad_dadliest_catch
- Circuit Dude: <http://circuitdude.com/presskit.php>
- Tiny & Big: <https://www.blackpants.de/project-tiny-big/>
- Square Maze: <https://gladiogames.com/square-maze-press-kit/>
