EDUCATION

DIGIPEN INSTITUTE OF TECHNOLOGY | Redmond, Washington

B.S. in Real-Time Interactive Simulation | GPA: 3.95/4.0

Expected May 2028

Relevant Mathematics Coursework (All A Grades): MAT 180 – Vector Calculus I; MAT 230 – Vector Calculus II; MAT 140 – Linear Algebra and Geometry; MAT 250 – Linear Algebra

RELEVANT SKILLS

Academic Support: Peer Mentoring, Technical Explanation, Collaborative Problem Solving

Professional: Communication, Organization, Reliability, Independent Problem Solving

PEER ACADEMIC SUPPORT

DigiPen Institute of Technology

2024 – Present

- Regularly assisted classmates with mathematics and programming coursework by explaining concepts and problem-solving approaches.
- Helped peers work through challenging problems step by step rather than simply providing answers.
- Adapted explanations based on classmates' questions and levels of understanding.

WORK EXPERIENCE

Republic of Korea Air Force | Sergeant (ROMAD Specialist) | South Korea

Aug 2022 – May 2024

- Coordinated with personnel across multiple units to support clear communication and effective execution during field operations.
- Maintained and operated mission-critical communication equipment and tactical vehicles, requiring consistent attention to detail and reliability.
- Completed 21 months of military service in a high-pressure environment, demonstrating discipline, adaptability, and the ability to work independently.

PROJECT & LEADERSHIP EXPERIENCE

Dragonic Tactics | Producer, Team Lead & Engine/Graphics Engineer

Sept 2025 – June 2026

- Led a five-person team through a year-long game development project, coordinating milestones, task assignments, and collaboration between design and engineering.
- Applied lessons from prior leadership experience to establish clear expectations for respectful, constructive communication and effective teamwork.
- Supported team members through technical challenges by explaining concepts, discussing implementation approaches, and helping identify practical solutions.
- Independently ported the team's custom C++ engine from Raylib to OpenGL, removing its Raylib dependency and rebuilding core rendering functionality.

Pleasure of Treasure | Producer & Team Lead

Fall 2024

- Led a four-person team through my first collaborative game development project while navigating new technical challenges and changes in team composition.
- Resolved a disagreement between team members through individual conversations and facilitated a compromise that allowed the team to move forward with a shared direction.
- Developed a more proactive approach to team coordination, conflict resolution, and project planning that informed later leadership roles.
