

Dear Klaviyo Hiring Team,

I am excited to apply for the Software Engineer Intern position for Summer 2027. I am currently pursuing a B.S. in Computer Science in Real-Time Interactive Simulation at DigiPen Institute of Technology, where I have built a strong foundation in C++, data structures, object-oriented programming, software architecture, debugging, and systems-oriented development.

Through my academic and team projects, I have gained hands-on experience designing, implementing, and improving complex software systems. As an Engine and Graphics Engineer on a five-person team, I refactored a custom C++ engine by removing an external rendering dependency and redesigning the rendering layer around a directly integrated OpenGL implementation. I also designed inter-system communication using an EventBus to decouple engine and gameplay systems, which strengthened my understanding of maintainability, modularity, and architectural trade-offs.

I have also served in technical leadership roles, helping coordinate development priorities, resolve integration issues, and support teammates across different parts of a project. These experiences taught me how to communicate technical decisions clearly, work effectively in collaborative environments, and think about software not only at the feature level but also as a larger system that must remain reliable and maintainable.

What particularly interests me about Klaviyo is the opportunity to work on software products that operate at scale and directly support real users and businesses. I am especially interested in product-oriented software engineering, backend systems, and the design of reliable software platforms, and I would be excited to apply my systems background while learning from engineers working on production systems in a fast-moving environment.

Thank you for your time and consideration. I would welcome the opportunity to contribute my technical foundation, problem-solving skills, and curiosity to Klaviyo while continuing to grow as a software engineer.

Sincerely,
Taekyung (Jean) Ho
