EDUCATION

DIGIPEN INSTITUTE OF TECHNOLOGY | Redmond, WA

B.S. in Computer Science in Real-Time Interactive Simulation | GPA: 3.96/4.0

Expected May 2028

Relevant Coursework: Data Structures, Algorithm Analysis, Operating Systems, Computer Graphics I & II, Linear Algebra

PROJECTS

Dragonic Tactics | Producer & Engine/Graphics Engineer

Sep 2025 – Jun 2026

2D Turn-Based Tactical RPG | C++, OpenGL

- Refactored a custom C++ engine to remove an external rendering dependency and integrate a new rendering layer, improving modularity and control over system behavior.
- Designed inter-system communication using an EventBus to decouple engine and gameplay systems while retaining direct access where tighter subsystem integration was required.
- Engineered and debugged a custom 2D OpenGL rendering pipeline supporting texture mapping, batch rendering, instanced rendering, and resolution-independent rendering.
- Served as Producer on a 5-person team, coordinating milestones, resolving cross-system integration issues, and aligning development priorities across the team.

10..9..8.. | Technical Lead

Spring 2025

2D Dungeon Exploration Puzzle Game | C++, raylib

- Led technical development of a C++ application built on a custom engine, coordinating implementation across reusable engine systems and application-specific logic.
- Designed and implemented engine architecture using ECS (Entity Component System) and the Singleton pattern to organize objects, components, and core systems.
- Guided technical decisions, debugging, and project integration while separating reusable software systems from application-specific logic.

WORK EXPERIENCE

Republic of Korea Air Force | ROMAD Specialist | 10th Fighter Wing, Suwon, South Korea

Aug 2022 – May 2024

- Served as a ROMAD (tactical air communications maintenance specialist), maintaining specialized military vehicles equipped with ground-to-air radio communication systems.
- Operated and maintained additional ground-to-air radio equipment supporting communication between air traffic controllers and pilots.
- Performed routine inspections, troubleshooting, and equipment maintenance as a member of the Ground-to-Air Communications Maintenance Section, supporting reliable operation of communication systems.

TECHNICAL SKILLS

Programming Languages: C++, C, JavaScript

Concepts: Data Structures, Object-Oriented Programming (OOP), Software Architecture, Design Patterns, Entity Component System (ECS)

Tools: Git, CMake, Linux, Visual Studio, VS Code

C++: Modern C++, Templates, Smart Pointers, Manual Memory Management, Modules

Graphics: OpenGL, GLSL
