EDUCATION

DIGIPEN INSTITUTE OF TECHNOLOGY | Redmond, WA

B.S. in Computer Science in Real-Time Interactive Simulation | GPA: 3.96/4.0

Expected May 2028

Relevant Coursework: Operating Systems, Data Structures, Algorithm Analysis, Computer Graphics I & II, Linear Algebra

PROJECTS

Dragonic Tactics | Producer & Engine/Graphics Engineer

Sep 2025 – Jun 2026

2D Turn-Based Tactical RPG | C++, OpenGL

- Refactored a core C++ rendering subsystem by removing an external dependency and integrating OpenGL directly, debugging integration issues and validating behavior across the engine.
- Designed inter-system communication using an EventBus to reduce coupling between engine and gameplay systems, creating clearer interfaces between subsystems and supporting more maintainable integration.
- Served as Producer on a 5-person team, coordinating milestones, translating project needs into technical priorities, and resolving integration issues across multiple software components.
- Engineered a real-time 2D rendering pipeline supporting texture mapping, batch rendering, instanced rendering, and virtual resolution while debugging and validating system behavior.

10..9..8.. | Technical Lead

Spring 2025

2D Dungeon Exploration Puzzle Game | C++, raylib

- Led technical development of a team software project using a custom C++ engine, defining core technical decisions and coordinating implementation across the project.
- Designed and implemented reusable engine architecture using an Entity Component System (ECS) and Singleton pattern to organize components and core systems.
- Separated reusable engine systems from application-specific logic, improving modularity and making the codebase easier to troubleshoot, integrate, and extend as the project evolved.

WORK EXPERIENCE

Republic of Korea Air Force | ROMAD Specialist | 10th Fighter Wing, Suwon, South Korea

Aug 2022 – May 2024

- Served as a ROMAD (tactical air communications maintenance specialist), maintaining specialized military vehicles equipped with ground-to-air radio communication systems in an operational environment.
- Operated and maintained additional ground-to-air radio equipment supporting communication between air traffic controllers and pilots.
- Performed routine inspections, troubleshooting, and equipment maintenance to identify and resolve equipment issues, supporting reliable operation of field communication systems.

TECHNICAL SKILLS

Programming Languages: C++, C, JavaScript, x86-64 Assembly

Version Control: Git, Github

Tools: CMake, Linux, Windows, Visual Studio, VS Code, NASM

Concepts: Operating Systems, Data Structures, Algorithms, Object-Oriented Programming (OOP), Software Architecture, Design Patterns, Entity Component System (ECS)

C++: Modern C++, Templates, Smart Pointers, Manual Memory Management, Modules

Graphics: OpenGL, GLSL
