## EDUCATION

**DIGIPEN INSTITUTE OF TECHNOLOGY | Redmond, WA**

**B.S. in Computer Science in Real-Time Interactive Simulation | GPA: 3.96/4.0**

**Expected May 2028**

**Relevant Coursework: Data Structures, Algorithm Analysis, Operating Systems, Computer Graphics I & II, Linear Algebra**

## PROJECTS

**Dragonic Tactics | Producer & Engine/Graphics Engineer**

**Sep 2025 – Jun 2026**

2D Turn-Based Tactical RPG | C++, OpenGL

- Refactored a custom C++ engine by removing an external rendering dependency and integrating OpenGL directly, improving modularity, maintainability, and control over a core software subsystem.
- Designed inter-system communication using an EventBus to reduce coupling between engine and gameplay systems, enabling cleaner integration and more independent development across subsystems.
- Served as Producer on a 5-person team, coordinating project milestones, technical priorities, and integration while helping move features from design through implementation.
- Engineered a real-time 2D rendering pipeline supporting texture mapping, batch rendering, instanced rendering, and virtual resolution while debugging and integrating features across the engine.

**10..9..8.. | Technical Lead**

**Spring 2025**

2D Dungeon Exploration Puzzle Game | C++, raylib

- Led technical development of a team software project using a custom C++ engine, owning core technical decisions and coordinating implementation across the project.
- Designed and implemented engine architecture using an Entity Component System (ECS) and Singleton pattern to organize reusable components and core systems.
- Separated reusable engine systems from application-specific logic, improving modularity and supporting maintainable integration as the project evolved.

## WORK EXPERIENCE

**Republic of Korea Air Force | ROMAD Specialist | 10th Fighter Wing, Suwon, South Korea**

**Aug 2022 – May 2024**

- Served as a ROMAD (tactical air communications maintenance specialist), maintaining specialized military vehicles equipped with ground-to-air radio communication systems.
- Operated and maintained additional ground-to-air radio equipment supporting communication between air traffic controllers and pilots.
- Performed routine inspections, troubleshooting, and equipment maintenance as a member of the Ground-to-Air Communications Maintenance Section, supporting reliable operation of communication systems.

## TECHNICAL SKILLS

**Programming Languages:** C++, C, JavaScript

**Version Control:** Git, Github

**Tools:** CMake, Linux, Visual Studio, VS Code

**Concepts:** Data Structures, Algorithms, Object-Oriented Programming (OOP), Software Architecture, Design Patterns, Entity Component System (ECS)

**C++:** Modern C++, Templates, Smart Pointers, Manual Memory Management, Modules

**Graphics:** OpenGL, GLSL
