EDUCATION

DIGIPEN INSTITUTE OF TECHNOLOGY | Redmond, WA

B.S. in Computer Science in Real-Time Interactive Simulation | GPA: 3.96/4.0

Expected May 2028

Relevant Coursework: Operating Systems, Data Structures, Algorithm Analysis, Computer Graphics I & II, Linear Algebra

PROJECTS

Dragonic Tactics | Producer & Engine/Graphics Engineer

Sep 2025 – Jun 2026

2D Turn-Based Tactical RPG | C++, OpenGL

- Refactored a custom C++ engine to remove an external rendering dependency and directly integrate OpenGL, increasing control over a core subsystem and simplifying its architecture.
- Designed inter-system communication using an EventBus to decouple engine and gameplay systems while retaining direct access where tighter subsystem integration was required.
- Engineered reusable rendering infrastructure supporting texture mapping, batch rendering, instanced rendering, and virtual resolution for resolution-independent rendering.
- Served as Producer on a 5-person team, coordinating project milestones, technical priorities, and integration across multiple software systems.

10..9..8.. | Technical Lead

Spring 2025

2D Dungeon Exploration Puzzle Game | C++, raylib

- Led the technical development of a dungeon exploration game built around a 10-step movement constraint, using a custom C++ engine developed as part of DigiPen's Game Implementation Techniques coursework.
- Designed and implemented modular engine architecture using ECS (Entity Component System) and the Singleton pattern to organize components and core systems.
- Guided technical decisions, debugging, and project integration while separating reusable software systems from application-specific logic.

WORK EXPERIENCE

Republic of Korea Air Force | ROMAD Specialist | 10th Fighter Wing, Suwon, South Korea

Aug 2022 – May 2024

- Served as a ROMAD (tactical air communications maintenance specialist), maintaining specialized military vehicles equipped with ground-to-air radio communication systems.
- Operated and maintained additional ground-to-air radio equipment supporting communication between air traffic controllers and pilots.
- Performed routine inspections, troubleshooting, and equipment maintenance as a member of the Ground-to-Air Communications Maintenance Section, supporting reliable operation of communication systems.

TECHNICAL SKILLS

Programming Languages: C++, C, JavaScript

Tools: Linux, Git, CMake, Visual Studio, VS Code

Concepts: Software Architecture, Data Structures, Object-Oriented Programming (OOP), Design Patterns, Entity Component System (ECS)

C++: Modern C++, Smart Pointers, Manual Memory Management, Templates, Modules

Graphics: OpenGL, GLSL
