EDUCATION

DIGIPEN INSTITUTE OF TECHNOLOGY | Redmond, WA

B.S. in Computer Science in Real-Time Interactive Simulation | GPA: 3.96/4.0

Expected May 2028

Relevant Coursework: Data Structures, Algorithm Analysis, Operating Systems, Computer Graphics I & II, Linear Algebra

PROJECTS

Dragonic Tactics | Producer & Engine/Graphics Engineer

Sep 2025 – Jun 2026

2D Turn-Based Tactical RPG | C++, OpenGL

- Refactored a custom C++ game engine by removing its raylib rendering dependency and integrating **OpenGL** directly.
- Engineered a custom **2D OpenGL rendering pipeline** supporting texture mapping, **batch rendering**, **instanced rendering**, and **virtual resolution** for resolution-independent rendering.
- Designed inter-system communication using an **EventBus** to decouple engine and gameplay systems while retaining direct access where tighter subsystem integration was required.
- Served as **Producer** on a 5-person team, coordinating project milestones, development schedules, and team priorities.

10..9..8.. | Technical Lead

Spring 2025

2D Dungeon Exploration Puzzle Game | C++, raylib

- Led the technical development of a dungeon exploration game built around a **10-step movement constraint**, using a custom C++ engine developed as part of DigiPen's **Game Implementation Techniques** coursework.
- Designed and implemented the engine architecture using **ECS (Entity Component System)** and the **Singleton pattern** to organize game objects, components, and core engine systems.
- Guided technical decisions and project integration while separating reusable **engine systems** from game-specific gameplay logic.

WORK EXPERIENCE

Republic of Korea Air Force | ROMAD Specialist | 10th Fighter Wing, Suwon, South Korea

Aug 2022 – May 2024

- Worked as part of a military unit, collaborating with teammates to complete assigned responsibilities and support day-to-day unit operations.
- Consistently fulfilled assigned duties in a structured, team-oriented environment, demonstrating reliability, accountability, and discipline throughout mandatory military service.

TECHNICAL SKILLS

Programming Languages: C++, C, JavaScript, x86-64 Assembly

Version Control: Git, Github

Tools: CMake, Linux, Visual Studio, VS Code, NASM

Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP), Software Architecture, Design Patterns, Entity Component System (ECS)

C++: Modern C++, Templates, Smart Pointers, Manual Memory Management, Modules

Graphics: OpenGL, GLSL
