EDUCATION

DIGIPEN INSTITUTE OF TECHNOLOGY | Redmond, Washington

B.S. in Real-Time Interactive Simulation | GPA: 3.92/4.0

May 2028

Relevant Courses: CS280 – Data Structures ; CS200,250 – Computer Graphics I,II

TECHNICAL SKILLS

Programming Languages: C++

Engines: OpenGL based custom engine

Interpersonal Skills: Passion for making life better, Dedicated to Quality

WORK EXPERIENCE

Republic of Korea Air Force | Staff Sergeant (ROMAD Specialist) | South Korea

Aug 2022 – May 2024

- Fulfilled 21 months of mandatory military service with honor, demonstrating high levels of discipline, adaptability, and commitment to national defense.
- Served as a ROMAD (Radio Operator Maintenance and Driver), specializing in tactical communication systems and field operation support.
- Managed the maintenance and operation of mission-critical radio equipment and tactical vehicles, ensuring 100% operational readiness in high-pressure environments.
- Coordinated with diverse units to facilitate seamless communication and tactical execution during field exercises.

PROJECTS

Dragonic Tactics | Producer & Engine/Graphics Engineer

Sept 2025 – June 2026

- Collaborated in a team of 5 to develop a **2D tactical RPG engine** from scratch using **C++**.
- Served as **Producer**, managing project milestones, scheduling tasks, and coordinating cross-functional team efforts to ensure timely delivery.
- Architected a custom engine utilizing **Entity Component System (ECS)** and **Singleton** patterns to ensure high-performance, data-oriented design.
- Engineered a **2D graphics rendering pipeline** using **OpenGL**, implementing efficient sprite batching and spatial transformations.

LEADERSHIP EXPERIENCE

DigiPen Institute of Technology | Team Lead | Daegu, Korea

- Established the project's strategic roadmap and technical vision, ensuring alignment between design and engineering departments.
- Facilitated **conflict resolution** and maintained team morale during critical development milestones to foster a productive environment.
- Mentored team members on software architecture best practices, leading the team through complex technical challenges.
